2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

Priority

1. ☒ The following document has not yet been furnished:

☒ copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date in the claimed priority date.

2. ☐ This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

3. Additional observations, if necessary:

| 2. Citations and explanations: | | | |
| 1. The present report makes reference to the following documents: | | | |
| D1: EP-A-194634 | | | |
| D2: US-A-3790742 | | | |
| D3: FR-A-2813158 | | | |
| 2. Document D1 is considered the closest prior art. It discloses: | | | |
| a copper nozzle for a plasma torch having a protective layer for its inner surface. The protective layer consists of a hard material such as titanium nitride. The protective layer increases the arc resistance properties and thus the useful life of the nozzle. The subject matter of claim 1 is therefore novel (PCT Article 33(2)). | | | |
| 3. The problem to be solved by the present invention can thus be seen as the fact that the high temperatures and the high flow velocity of the plasma stream cause damage to the nozzle, such as delamination, cratering or flaking. In order to increase the useful life of the nozzle, the invention provides the solution wherein microparticles of a hard material are embedded | | | |

into the metal of the nozzle. Durability can be increased as a result of the embedded microparticles. This solution cannot be found in the prior art and is not obvious to a person skilled in the art. It therefore satisfies the requirements of PCT Article 33(3) with respect to inventive step.
